

GOVERNMENT OF BERMUDA
Ministry of Public Works

Department of Works and Engineering

July 01, 2020

Dear Proponents

Ref: 31-262-75B-01B Prospect Telecommunications Tower

This Addendum #2a contains (1) pages.

The following addendum supersedes information contained in the RFP to the extent referenced. This addendum forms part of the RFP documents and will be subject to all of the conditions set out in the contract conditions.

1. Tower arrived at site

Please be advised that the first of two trailers with tower components has been delivered to site. The second shipment is due to sail on Friday July 3rd, with delivery to the site early the following week. Interested parties are welcome to inspect at their convenience. This may be useful in evaluating how much touch-up the coatings will need, and what equipment may be best to handle the components.

2. Additional pipe connection information

When connecting the new HDPE pipeline to the existing ductile iron pipeline (north edge of the site, adjacent to building #25) there needs to be a transition from the main line with a flanged tee. Working from the HDPE tee there will be a flanged gate valve and check valve as per the attached details (Addendum #2b). Both valves will need to be installed in a chamber with a cover.

There will also need to be a style FCA501 connector (Annex I) from the flange of the check valve to join to the existing ductile iron pipe.

3. Response to Questions

Q: Please can you advise if this Project would be BDA Customs duty and wharfage exempt on new materials imported?

A: The project will not benefit from any duty or wharfage exemption.

Enclosed:

Addendum 2b – Details of gate and check valves

END OF ADDENDUM #1a

Note: Amendment/addenda will be posted at <https://www.gov.bm/procurement-notices>. Respondents should visit the Government Portal website on a regular basis during the Procurement process.
